

SPECTRA
DESIGN BUILD

We are extremely satisfied with Spectra and would recommend them for any renovation projects in the future.

Christian and Holly

We are completely pleased with our beautiful apartment renovation and are proud to recommend Spectra.

Mark

Very positive experience. I recommend them without reservation.

Simona

My wife and I absolutely love our kitchen and we feel we had an excellent experience with Spectra.

Meticulous Work Tailored to Your Style

SPECTRA is an innovative New York City design-build firm distinguished by an integrated approach that goes beyond the limits of traditional interior design and remodeling practices. We offer the combined capabilities of a design studio, general contracting team and fabrication shop to ensure that every job is customized and completed to perfection, all under our careful supervision.

At SPECTRA, we pride ourselves on creating individually-tailored interiors that feature unique design, solid construction and quality finishes with extreme attention to detail in every project. To fulfill our clients' discerning needs, we provide expertise in a range of disciplines in the areas of design, building and renovation, whether the goal is an entire reconstruction or separate elements to reinvent one's home.

From historic to contemporary luxury, no matter what the scope of work, we are committed to creating exceptional and unique homes through top-of-the-line craftsmanship that our clients can enjoy for years to come.

What is Design-Build? Design-build is an integrated approach that delivers design and construction services under one contract with a single point of responsibility. Across the country and around the world, the design-build method successfully delivers office buildings, schools, stadiums, transportation and water infrastructure projects with superior results.

The Design-Build Advantage. Design-build provides benefits for both owners and practitioners. Dealing with a single entity decreases owners' administrative burden and allows them to focus on the project, rather than managing separate contracts.

Member of NKBA. The National Kitchen & Bath Association (NKBA) is a non-profit trade association that promotes the professionalism of the kitchen and bath industry. Established in 1963 as a network of kitchen dealers, it has grown into the premier association of distributors, retailers, remodelers, manufacturers, fabricators, installers, designers, and other professionals.

Member of DBIA. Founded in 1993, the Design-Build Institute of America (DBIA) is the only organization that defines, teaches and promotes best practices in design-build project delivery.

DBIA promotes the value of design-build project delivery and teaches the effective integration of design and construction services to ensure success for owners and design and construction practitioners.
